

DOM Practice

Parent and Children

- Set the background of “Me” to red
- Set the background of “Parent” to orange (Hint: use parentNode property to retrieve the parent node)
- Set the background of “First Child” to yellow
- Set the background of “Second Child” to green

Colors

In a loop, ask the user to specify the color of child 0 to 7 and store the colors in an array. Possible color values are yellow, green, and blue.

In another loop, set the color of each child accordingly.

Rainbow

Ask the user to specify 5 colors into an array of 5 elements. Possible color values are red, orange, yellow, green, blue, and indigo.

Set the colors of the 5 boxes based on the user input. The color stored in the first array element is used for the outmost box and the last for the innermost box.

Postcard

Ask the user to specify:

- Greeting text
- Card background
- Photo background
- Tree size

Create the post card accordingly.
